2. Background Information

Advances in information technology has resulted in increase of number of media and monitoring them and understanding them has become challenging. Directorate of Public Relation (DPR) invites Request for Proposal (RFP) for selection of consultancy/agency to work for DPR as an Agency on record through an open competitive selection process in accordance with the procedure set out herein to create and manage Social Media & MP MyGov Portal, that helps DPR to measure the impact of media and collect direct feedback from the public at a regular interval and present to the government.

The Complexities and multiplicities of Media have increased over a period of years, keeping pace with what appears in the media viz: print, TV, digital, social and others has become a difficult task. DPR has felt a need to evolve a system which helps in detailed understanding of government’s perception and performance as seen by the media, including social media. This system should be capable of collating, processing, analysing, interpreting and presenting government related news/issues in a form which can be used as a feedback mechanism that could be used to improve governance.

As no such comprehensive monitoring, research and feedback gathering system is available, through this process, DPR intends to have that expertise developed through the selected agency. This will also help DPR and other government departments to take corrective actions, address the grievances, and improve the service delivery of the government schemes in the future.

This agency will not only help DPR to obtain a comprehensive and detailed view of the news in the media universe, but will also allow study of the trends, which will help the directorate device better communication strategy for the state. This cell will also be responsible for collecting, analysing, and presenting regular feedback from the field as directed by DPR on various government initiatives and schemes. The mechanism for the same is explained in detail in the scope of work. The cell will also help DPR communicate effectively directly to the public using social and digital media platforms about various initiatives of the government.

The agency will provide dedicated product driven solutions, and qualified manpower to implement the research projects at a fixed frequency and as and when needed by the client. The reports will be designed as directed by the DPR and provide necessary support/tools to help Government to make informed decisions. The agency needs to carry out PR related activities on a regular interval and for the events as mentioned in the RFP. The detailed scope of work is mentioned in this document.
